

art-research
sponge & the topological media lab

Sha Xin Wei
Associate Professor, Canada Research Chair
Fine Arts and Computer Science, Concordia University

An abstract painting with a textured surface. The background is a mix of light blue and grey. There are several large, irregular shapes in shades of orange and red. A prominent dark blue or black line runs diagonally across the center. There are also some smaller, scattered orange and red spots. The overall style is expressive and somewhat chaotic.

Topological Media Lab

= atelier + studio + laboratory

Motivations

Strategy: Create works in public, cultural domain
Derive questions from these public projects
Develop conceptual approaches
Design & build laboratory
Create new works in public, cultural domain

Events in Public

(What do we need more art, objects for?)

What's an event: A game, theater, dance, festival...
athletic event, climbing a mountain, a dinner, speech, ...

design spaces and **events** as architectural phenomenological experiments

arakawa and gins, ubiquitous site, nagi

How can we build a world that's not complicated, but rich?

events in responsive spaces (chamber scale)

tgardens 2000-2001 sponge + foam

events in responsive spaces (building scale)

events in interior space: body scale

sauna • sponge • sfemf 2002, san francisco

events in exterior space. the street

cybernetics ("why can't we open the windows?") vs sponge sauna 2003 (open-loop air-conditioning)

Hubbub

events in exterior space: the city
public speech, speech as writing as speech

An abstract painting with a textured surface, featuring a palette of muted blues, greys, and earthy oranges and browns. Dark, expressive brushstrokes in black and dark blue are scattered across the composition, creating a sense of movement and depth. The overall effect is one of organic complexity and layered meaning.

Events in Public → Art Research

**Ethico-aesthetic experiments:
whole, dense, palpable, shared experience.
Art as vehicle (Brook).
Art all the way down.**

design spaces and **events** as architectural phenomenological experiments

arakawa and gins, ubiquitous site, nagi

Art Research: Ethics+Aesthetics

Design **EVENTS** (not objects)

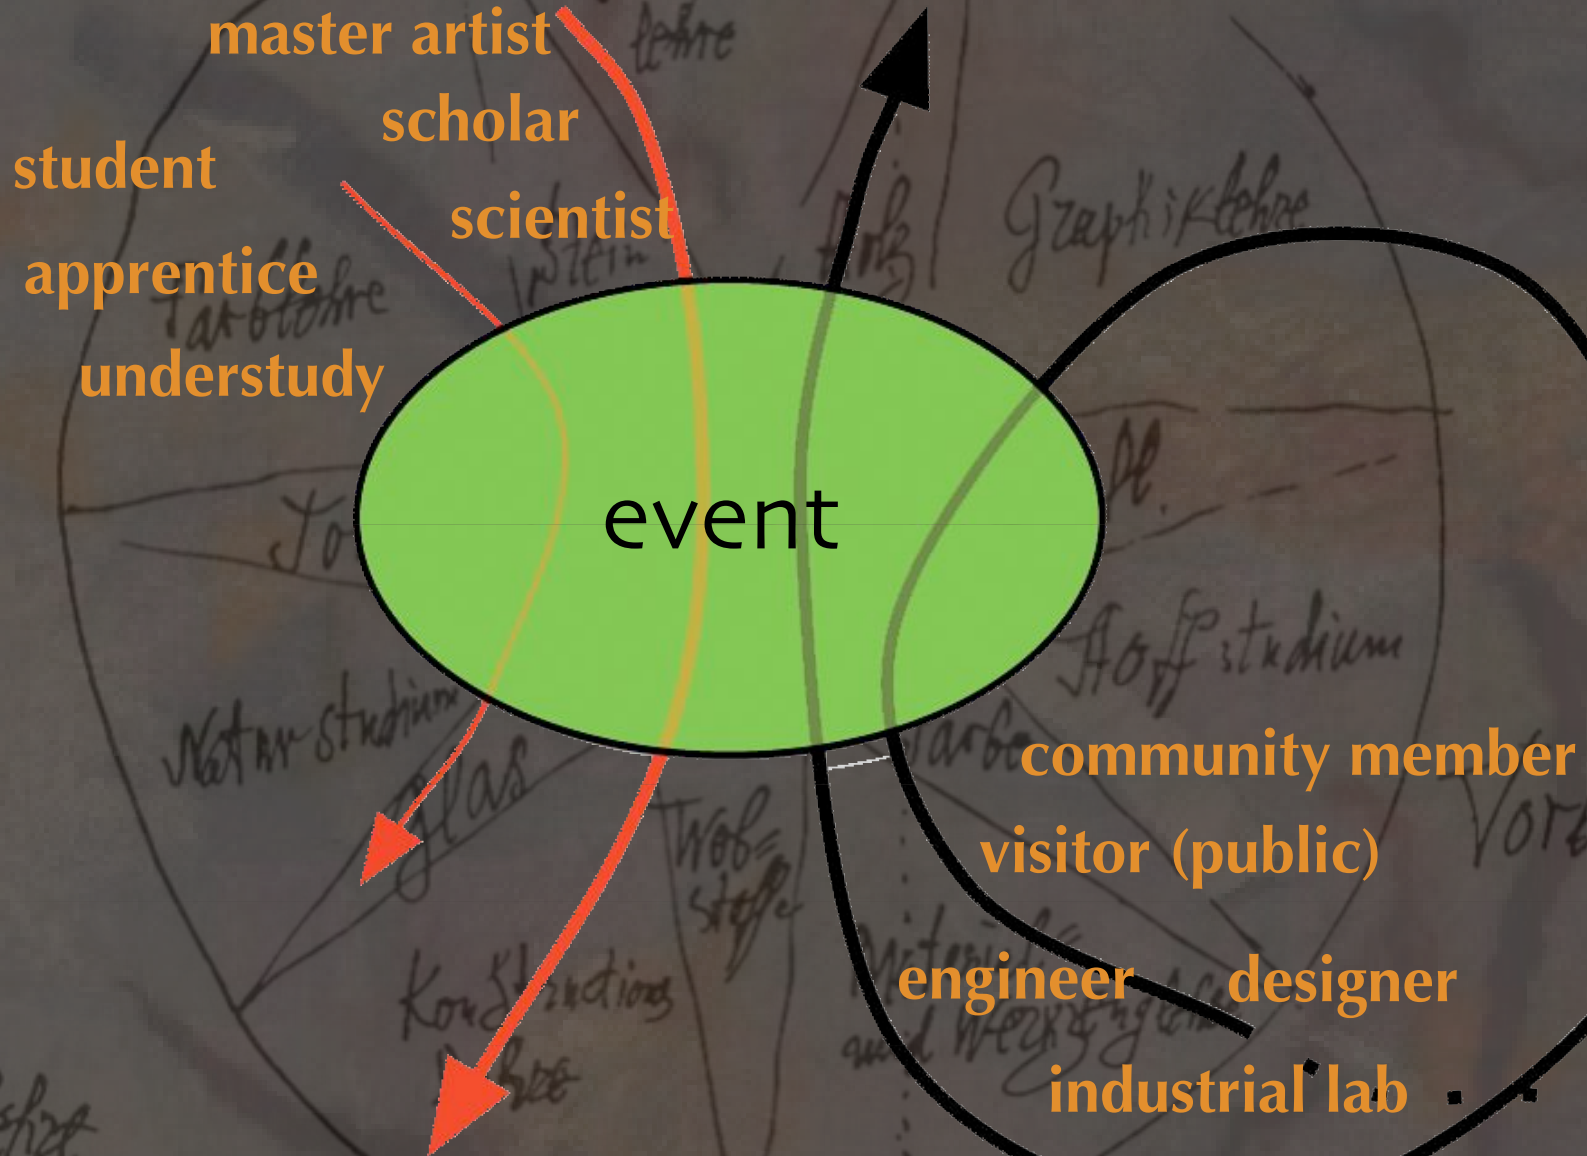

sensitive to context, from intimate to urban scales of design.

Discover heuristics for techno-scientific research:

“We can make anything. Why this, rather than that?”

Hence **Critical Studies of Media Arts and Sciences**.

What does an event do?

percolate ideas across discourse communities
exchange vs resonance, boundary event

TML model

**Art in Public /

what (when) is a gesture?

Craig Dongoski,
Atlanta 2004.

Satinder Gill,
Cambridge,
musicality and
rhythm in collective
gesture, 2005-2009.

intentional gesture

Search for correlates, not certificates, of intentional gestures.

Candidates:

- Periodicity (Auto-correlation)

- Synchrony (Correlation)

- Breaks from prediction (Kalman filter as discrepancy measure)

Continuous, real-time measures, range = $[0,1]$ not $\{0,1\}$

epiphany sans training

tg2001 sponge+foam

An abstract painting with a textured surface. The background is a mix of light blue and grey. There are several large, irregular shapes in shades of orange, red, and brown. Black outlines define some of these shapes, creating a sense of depth and movement. The overall style is expressive and somewhat somber.

wysiwyg gestural sound

A hand is shown holding a glowing green fabric controller. The controller is a long, thin strip of fabric that is illuminated from below, creating a bright green glow. The hand is positioned in the lower left, and the fabric extends towards the right. The background is dark, making the green glow stand out.

dynamics on manifolds

Total manifold = Metaphorical State \times Observables

$$M = \prod_{p=0}^{N_p} M_p = \prod_{p=0}^{N_p} \Gamma_p \times S_p.$$

State is a convex combination of elementary states

$$\gamma_p(t) = \sum_{j=1}^N \lambda_j(t) v_j$$

$$\sum_{j=1}^N \lambda_j(t) \equiv 1.$$

dynamical system on simplicial complex

Metaphor space: meaningful experience, manifold
State: (convex) combination of pure states
Potential energy $U = E(\text{sensor}) + E(\text{static})$
Kinetics: $F = -\text{Grad}[U] / \text{mass}$

An abstract painting with a textured surface. The background is a mix of light blue, white, and pale yellow. Overlaid on this are several dark, almost black, branching lines that resemble veins or roots. There are also patches of vibrant orange and reddish-brown, some of which are more saturated than others. The overall effect is one of organic, perhaps geological or biological, complexity.

Bill Viola, The Passions

To whom do you owe allegiance: Homo Sapiens Rex, or ...

to whom do you owe allegiance?
Homo Sapiens Rex
or...

the world ?

The force that through the green fuse drives the flower
Drives my green age; that blasts the roots of trees
Is my destroyer.
And I am dumb to tell the crooked rose
My youth is bent by the same wintry fever.

The force that drives the water through the rocks
Drives my red blood; that dries the mouthing streams
Turns mine to wax.
And I am dumb to mouth unto my veins
How at the mountain spring the same mouth sucks.

The hand that whirls the water in the pool
Stirs the quicksand; that ropes the blowing wind
Hauls my shroud sail.
And I am dumb to tell the hanging man
How of my clay is made the hangman's lime....

Dylan Thomas
